

Tables, graphs

This part was drawn up on the basis of statistical data of the Czech police unless other source is indicated. Detected crime is identical with the number of criminal offences detected by the Czech police in the given year. Crime per 10 thousand inhabitants is translated in relation to the number of inhabitants as of 1 January of the relevant year. The term “offender” is understood as numbers of known (detected) offenders of solved criminal offences.

**Development of Total Crime in the Czech Republic
from 2004 until 2013**

Note: The new Criminal Code, Act No. 40/2009 Coll. came into effect on 1 January 2010 and introduced tens of new elements of crimes and the considerable portion of sections was amended. For example an offence of "driving without a driving licence" does not belong among criminal acts any more (Sec. 180d of Act No. 140/1961 Coll.). Therefore the data on total crime in 2010 are indicated in a different colour.
