eIDAS – Regulation (EU) No 910/2014

eIDAS - Regulation on electronic identification and trust services
for electronic transactions in the internal market

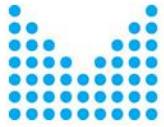

eIDAS implementation in the Czechia

Legislation - for implementation of eIDAS there are approved „key“ Acts:

- **No. 297/2016 Coll. Act on trust services for electronic transactions.**
- **No. 250/2017 Coll. Electronic identification Act.**

Target status:

Directly applicable eIDAS and complementary national „key“ legislation.

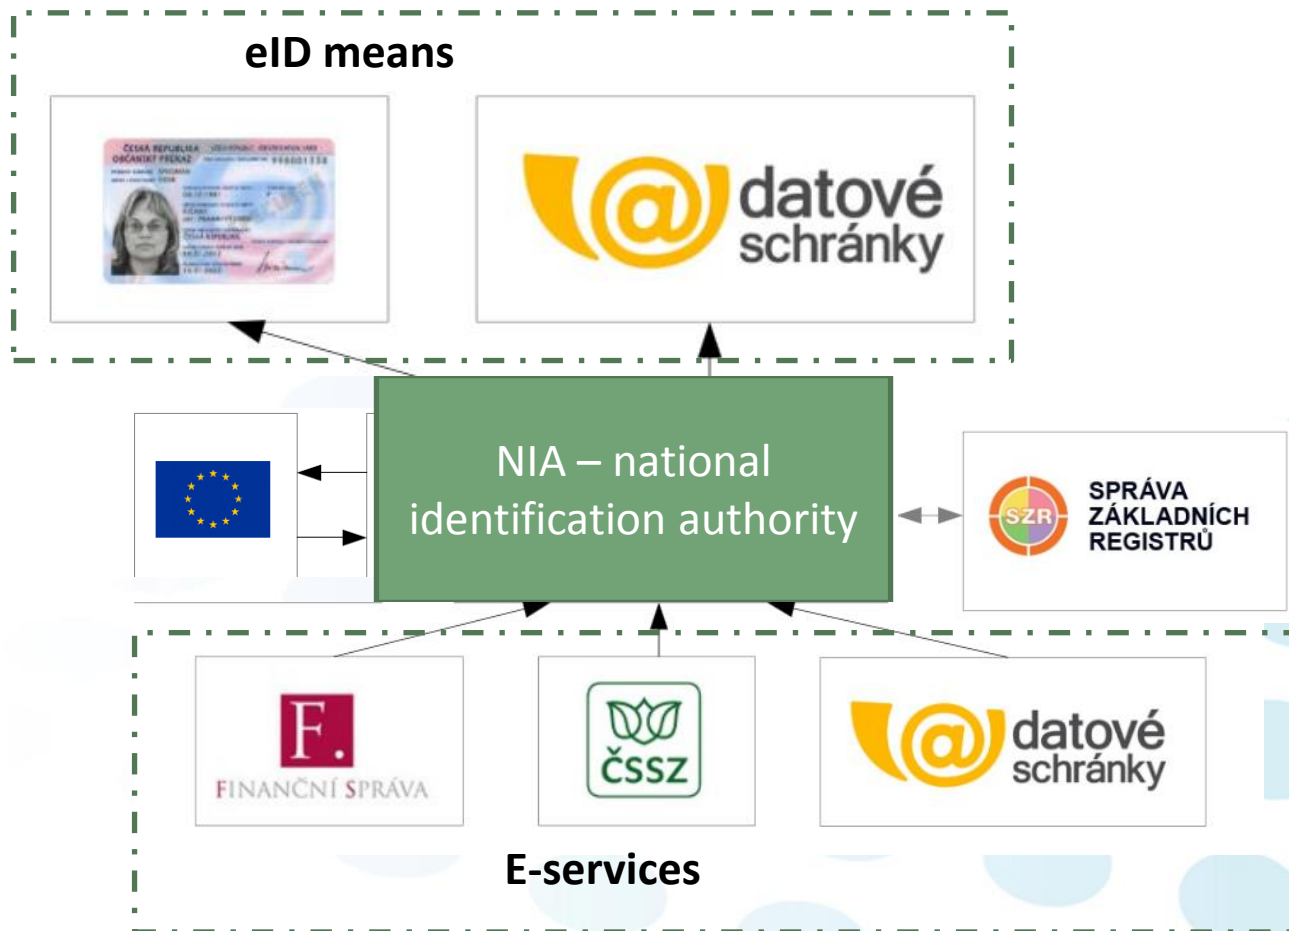

El. identification Act where to use?

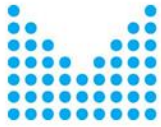

§ 2 Proof of identity using electronic identification

Where a proof of identity is required by law or a scope of (public administration) authority, authentication with the use of electronic identification may only be permitted through a qualified electronic identification system ("Qualified System").

eID Scheme in the Czech Republic

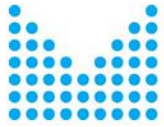

eIdentity card – current status

- **In Czechia issued from 1. 1. 2012**
 - ID **without chip** (free of charge)
 - eID with contact chip (fee 500 CZK)

Functionality of eOP

- Chip contains an eOP number, including its electronic signature
- allows to determine the size of free memory, verify the authenticity of the chip and the connection between the card plastic body and the chip
- to store and use certificates **for electronic signatures** issued by QTSP
- to store and use **certificates for authentication** issued by QTSP

„New“ eID card with contact chip from 7/2018

- New eID with a contact electronic chip will be issued free of charge to all citizens
- state-guaranteed trusted means of electronic identification that meets the requirements of the **eIDAS Assurance Level High** – „*higher degree of confidence in the claimed or asserted identity of a Person*“
- eID will be meeting the requirements of the eIDAS Regulation for a qualified electronic signature creation device (QSCD)
