Job shadowing

EC - DG GROW – Unit E/3

My top priority for job-shadowing is definitely DG GROW and its Unit E/3 Digitalisation of the Single Market. At my department at Ministry of Industry and Trade, I am responsible for the Services Directive and currently more importantly, the negotiation and subsequent implementation of the Single Digital Gateway Regulation. I am also a part of EUGO network of Points of Single Contact which structure will be affected by the SDGR. In view of the implementation of said Regulation, it would be very convenient to witness the preparations for entry of the Regulation into force and to possibly discuss some issues regarding SDG.

EC – DG GROW – Unit R/2

My second priority is within the same DG, however in another Unit. Unit R/2 Single Market Service Center is, among other things, responsible for functioning of the SOLVIT network of which I am on behalf of the Czech Republic part of. I have had an opportunity to meet my colleagues from the EC SOLVIT team on multiple occasions, yet seeing the way how they work on daily basis would definitely be an asset for my future work as part of SOLVIT network.

EC – DG GROW – Unit E/1

The third of my priorities for job-shadowing is Unit E/1 Service Policy for Consumers. As I indicated above, the significant part of my work is Services Directive in general and its implementation. Unit E/1 is responsible, again among other things, for the implementation of the Services Directive. To job-shadow in this Unit would certainly become a major asset for my future work regarding this essential legislation in the field of Internal Market.

Job shadowing

1. European Commission, DG Regio – DGA2, division F.4

My current work position in the intermediary body for priority axis 4 of the OP Environment involves above all methodical adjustment of the PA according to Regulation (EU) No 1303/2013 and national terms stated by the Ministry of Regional Development. The main partner in implementation of the OPE is DG Regio, division F.4. We cooperated frequently before the OPE was ratified in 2015. At present, the communication with directorate's representatives is mostly via Monitoring Committee.

The main fields of cooperation are:

- result and output indicators
- assessment criteria
- general terms of the Regulation (EU) No 1303/2013 such as state aid or eligible applicants

My unit also administers technical assistance, which is one of the DG Regio's work contents, procures monitoring of programme outputs and provide reports required by the Managing authority.

2. European Commission, DG Environment D.4 LIFE Programme

My previous work experience as financial manager of the LIFE+ project involved apart from the financial management also frequent communication with external monitoring expert of the European Commission and drawing up reports on the project. Back than the DG we cooperated with has been ENV. E.3 LIFE – Nature.

3. European Commission, DG Environmental F.1 Sustainable Development Goals Strategy

Based on my current PhD studies, which concentrates on the sustainable development, its trends, political situation and legislation I have knowledge of sustainable development goals, strategies and environmental impact assessment.
