Revolution in Public Registers in the Czech Republic

Jindřich Kolář

*Head of the Unit for ICT Development and Project
Management in Public Administration*

Ministry of Interior

Czech Republic

MINISTERSTVO VNITRA
ČESKÉ REPUBLIKY

eGON & eGovernment

- Modern – Friendly – Effective
- eGON as a living organism

-  fingers – Czech POINT
-  circulatory system – KIVS
-  heart – eGovernment act
-  brain – primary registers of public administration

MINISTERSTVO VNITRA
ČESKÉ REPUBLIKY

Current state in public administration

- fragmentation of data in most registers
- duplicated data in public registers
- citizens have to repeatedly provide the same data to different authorities
- low effectivity in re-using the data in public registers

Future vision

- citizens will no longer repeatedly provide the same data to different authorities
- all authorities will have an access to the most accurate and up-to-date data
- the most frequently used data in the public administration will be shared from one source

MINISTERSTVO VNITRA
ČESKÉ REPUBLIKY

Solution

BASIC REGISTERS

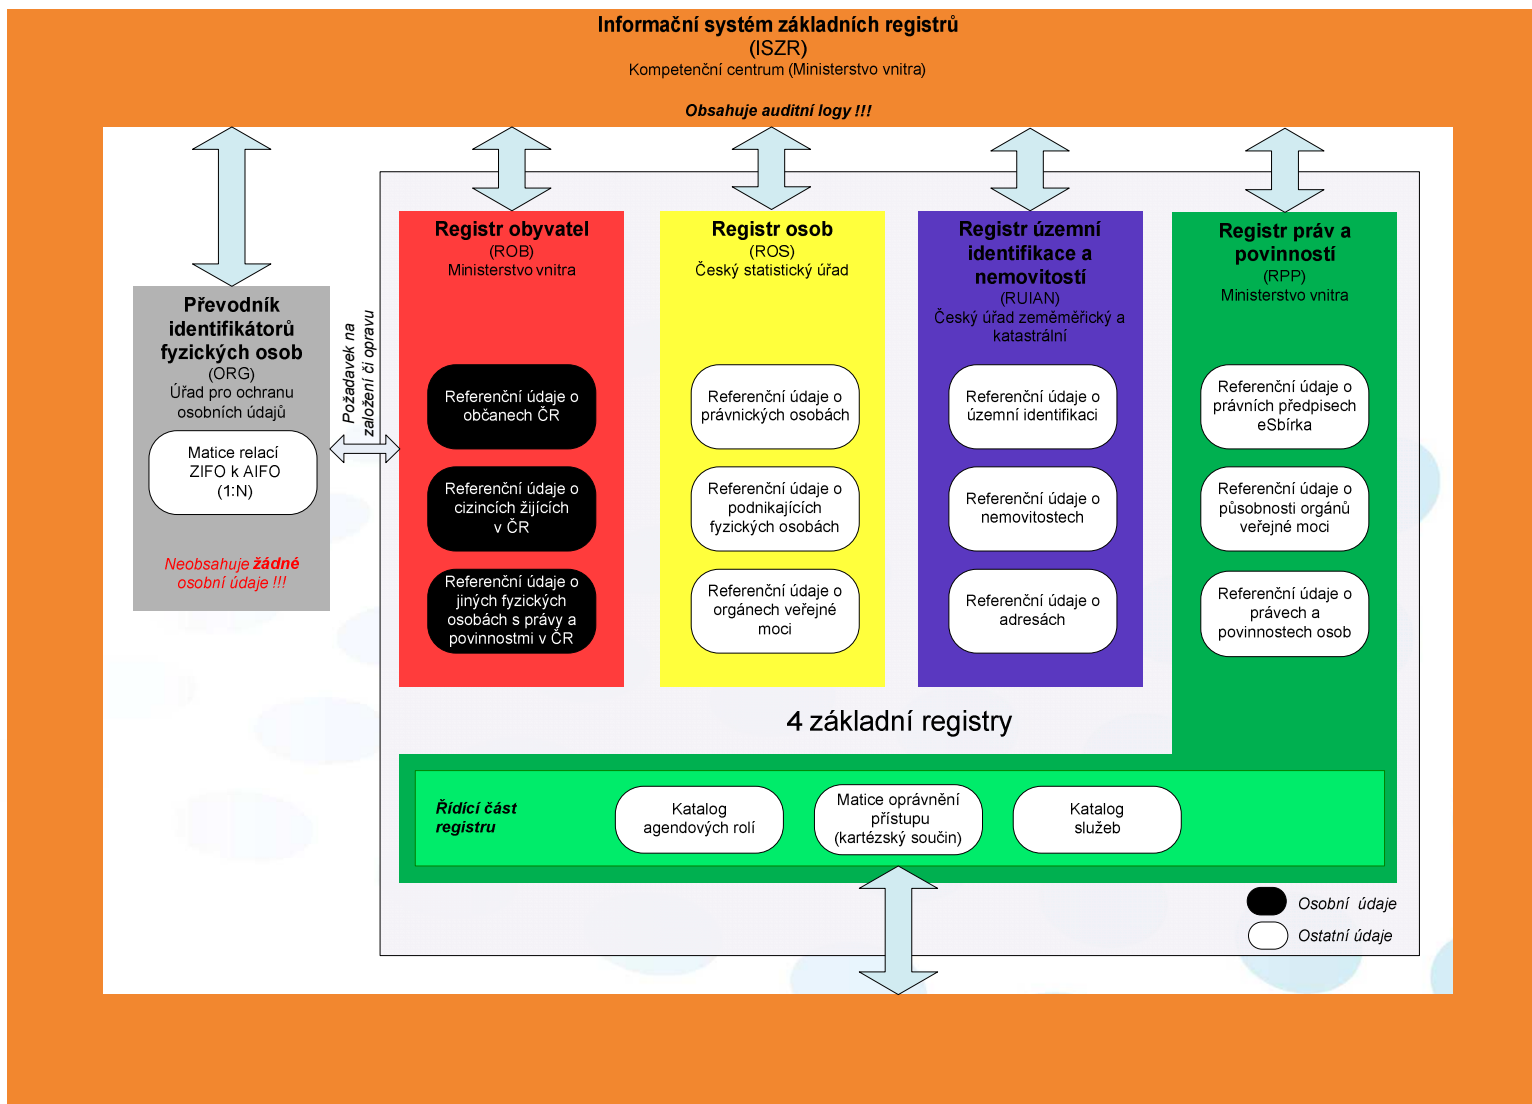

- four central basic registers as a reliable source of the most frequently used data in the public administration
- **aim:** to share the data among public authorities in a safe and controlled manner via information system of basic registers
- reference data in basic registers will be shared as accurate and up-to-date

Basic registers

Řízení poskytování služeb eGovernmentu

MINISTERSTVO VNITRA
ČESKÉ REPUBLIKY

BASIC REGISTERS overview

- register of inhabitants
- register of persons
- register of territorial identification, addresses and real estates property
- register of rights and duties

e-Identity

- a unique basic identifier of natural persons (BINP)
- from BINP will be generated for natural persons **unique identifier to every registered agenda** or evidence
- reducing the possibility of abusing of personal reference data

Personal Data Protection

- electronic identity offers the possibility to significantly improve the level of protection of citizen's privacy
- generation of special identifier of natural persons (BINP) will be supervised by **The Office for Personal Data Protection**
- authorized access of users will ensure that only competent authorities will be able to use personal reference data

Legal aspects

- Basic register Act
 - described process of re-using of reference data
 - definition of information system of basic registers
 - definition of basic registers and reference data
 - all basic register will be regulated by this Act
 - **expected to come into effect 01.07.2010**
